LANSING

REBECCA A. HUMPHRIES
DIRECTOR

September 17, 2007

TO: Rebecca A. Humphries, Director

INFORMATION: Natural Resources Commission

SUBJECT: Protection of Lake Sturgeon, Muskellunge, and Walleye on the Black, Indian, and Cheboygan Rivers (FO-223) – FOR INFORMATION ONLY

Authority:

The Natural Resources and Environmental Protection Act, 1994 PA 451, as amended, authorizes the Director to provide for better protection and preservation of fish, game, and birds.

Discussion and Background:

We are proposing one change to this order to increase protection of spawning lake sturgeon in the Black, Indian, and Cheboygan Rivers. Law enforcement and the Sturgeon for Tomorrow have asked Fisheries Division to incorporate and modify this order to further protect lake sturgeon. The large, vulnerable fish have been known to inhabit these river systems in as late as June, which was not accounted for in the previous order (ending in May). Lake sturgeon is a threatened species in Michigan and cooperative efforts have been ongoing to study and protect this species in both Black Lake and the Black River. The Black River is the major spawning ground for lake sturgeon in the Black Lake system so we are recommending that the order be changed to extend the protection of this small population until June 15.
